01 · North Star

Perfect bookings fell 1,021 to 60,899 (74.8% of requests). Demand grew 1.9%, but fill rate leaked the most.

One number for the whole ops team: bookings that were completed, on time, with no complaint or redo, and rated 4★ or above (or not rated).

Every manager owns one term. If the number falls, the funnel shows whose term moved.

Perfect booking rate, last 12 weeks

Share of booking requests that became a perfect booking. Dashed line is the 77% target.

Where the week leaked

Each stage as a share of the one before it. The last column is the change in perfect bookings that stage caused vs last week.

Stage	This week	Conversion	vs last wk	Perfect bookings
Booking requests	81,400	—	+1.9%	+1,142
Partner assigned **Biggest leak**	74,562	91.6% of requests	−1.4 pts	−932
Completed	71,200	95.5% of assigned	−0.7 pts	−469
Started on time	62,941	88.4% of completed	−0.7 pts	−484
Perfect booking	60,899	96.8% of on-time	−0.4 pts	−279

The week in three lines

What changed	Fill rate fell 1.4 pts. Partner cancellations rose to 1.6%. Complaints went from 8.1 to 9.8 per 1,000.
Why	Weekend evenings ran out of partners in Mumbai and Bengaluru. Kit stock-outs rose in Gurugram and Noida. One wax batch drove complaints in two Gurugram hubs.
What we're doing	Weekend-evening incentive pilot in 3 hubs, kit refill plus auto-reorder, and retraining for 41 waxing partners. Two of these need your OK (slide 2).

Unfilled requests — 6,838 bookings
₹92.0 L
GMV not served this week, at an average order value of ₹1,345

Partner-side cancellations — 1,197 bookings
₹16.1 L
GMV lost after a partner was assigned. Up 240 on last week

Redo and refunds — 783 jobs
₹10.5 L
Order value at risk of being refunded or redone at our cost

Top 3 issues

1. **Complaints rose to 9.8 per 1,000.** Mostly waxing, in GGN-2 and GGN-4. Retrain 41 flagged partners and QC the wax batch.
   CX with Training & QA · due Thu 22 Oct
2. **Partner cancellations rose to 1.6%**, in step with kit stock-outs (3.2%). Refill the top 5 items at hubs.
   Inventory · was due 16 Oct, now 3 days late
3. **Fill rate fell to 91.6%**, weakest on weekend evenings in Mumbai and Bengaluru. Pilot a weekend shift incentive in 3 hubs.
   City Ops · due Fri 23 Oct

Wins

- **210 partners certified**, above the 200 target. Best week in 12.
- **Average rating held at 4.72**, above 4.70, despite the complaint spike.
- **Customer cancellations stayed under 3%** with 1.9% more requests.

Decisions needed from you

1. Approve the weekend-evening incentive pilot in MUM-2, MUM-4 and BLR-1 for 2 weekends.
2. Approve 5 days of buffer kit stock per hub, so reorders trigger automatically.
3. Sign off the metric dictionary, so all 5 teams report one fill rate.

Source: ops app extract, Week 42 · 12–18 Oct 2026 (mock). Published Mon 19 Oct, 11:00.

Weekend evenings ran out of partners: 14% of requests, but 29% of the unfilled ones. Mumbai and Bengaluru took the hit.

83% — 98% · gray = on target (95%)

Requests vs jobs completed, last 12 weeks

The gap is unfilled requests plus cancellations. It widened this week.

What the numbers say

Mumbai partners are already at 1.76 jobs a day, the highest of any city. An incentive alone won't add capacity there. Mumbai needs more partners for weekends.

Bengaluru requests grew 4.2%, the fastest of any city, and fill rate fell to 88.8%. Demand outran supply there first.

Rest of India partners do 1.44 jobs a day. That's spare capacity, but in the wrong cities. Density beats headcount.

Source: ops app extract, Week 42 · 12–18 Oct 2026 (mock). Published Mon 19 Oct, 11:00.

Onboarding beat target with 210 certified, but 90-day retention has been red for 12 straight weeks. Most partners are lost in weeks 2 to 4.

Supply is the constraint. More partners, kept longer and kept busy, is the only way fill rate holds through wedding season.

Partners by jobs per day

Average jobs per working day this week. 1,540 partners (21%) do under 1.

Active partners, last 12 weeks

Partners with 1 or more jobs in the week, against the 7,600 target.

What the numbers say

Weeks 2 to 4 lose 7–9 pts in every cohort. My guess: the first month of earnings and the first kit-loan payments. The Aug cohort survey (A-107) will confirm or kill that.

1,540 partners do under 1 job a day. Moving 1,000 of them into 2 weekend-evening jobs each would cover all 1,976 unfilled weekend-evening requests, if they sit in the right hubs.

Utilisation is the cheapest lever. Taking jobs per partner per day from 1.59 to 1.65 adds about 2,850 jobs a week without hiring anyone.

Complaints jumped to 9.8 per 1,000, and waxing alone explains 78% of the rise. Hubs short on kits also cancel more.

Ratings lag. Late arrivals, partner cancellations and kit stock-outs move first, so they are watched first.

Complaints per 1,000 jobs, by service

Last week to this week.

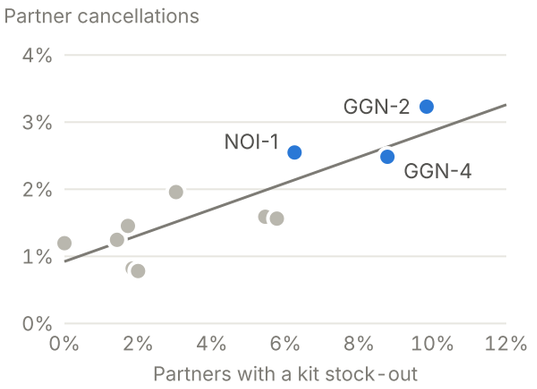

Worst 6 hubs by complaints

Of about 140 hubs. Complaint counts in brackets: small bases swing.

Hub	City	Jobs	Complaints / 1,000	Kit stock-out	Partner cancel
GGN-2	Gurugram	612	24.5 (15)	9.8%	3.2%
GGN-4	Gurugram	571	21.0 (12)	8.8%	2.5%
GGN-1	Gurugram	540	13.0 (7)	5.5%	1.6%
NOI-1	Noida & Ghaziabad	598	11.7 (7)	6.3%	2.5%
NOI-3	Noida & Ghaziabad	489	10.2 (5)	5.8%	1.6%
DEL-3	Delhi	640	9.4 (6)	3.0%	2.0%

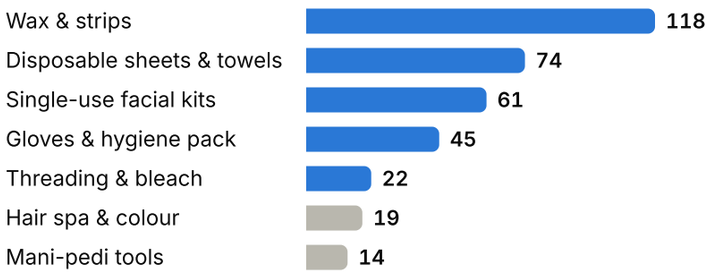

Kits drive cancellations

12 hubs. Correlation r = 0.86.

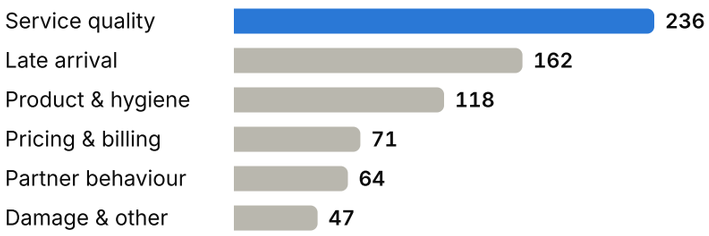

Kit items reported missing

Partners reporting each item. The top 5 items are 91% of reports.

Complaints by reason, this week

698 complaints in total.

What the numbers say

Waxing complaints went from 9.3 to 14.9 per 1,000. Other services barely moved. That points to a product batch, not skills, so the wax batch QC (A-103) comes first.

Fix kits upstream. Stock-outs raise partner cancellations, which cut fill rate. One refill SLA fixes three red numbers.

13 open actions, 3 overdue. Two are waiting on a decision from you.

Every action has one owner and one date. Overdue items turn red on their own and come first in the review.

Status as of Mon 19 Oct

Review rhythm

Mon 11:00	**Publish the MIS** Pull, check, send this pack.
Mon or Tue	**Weekly review, 45 min** You and the 5 managers. Tracker on screen, red items first.
Daily	**10-minute scan** Every overdue item gets a follow-up the same day.
Thu	**Red-item check** Mid-week pulse on anything at risk.
Fri	**Pre-read for you** Risks flagged before the weekend.
Month end	**Monthly review** Trends, targets, decisions.

When a date slips

Day 1	Day 2–3	Day 5	Then
Private nudge	Offer help, clear the blocker	Raise in review, with data	Your call

- Notes out within 2 hours: decisions, owners, dates.
- The manager hears it before you do. No surprises.

Source: action tracker, status as of Mon 19 Oct (mock). On-time closure counts the last 4 weeks.

A · Data health · before the pack goes out

8 checks ran before this pack went out. Two problems were caught and fixed before they reached you.

Most "data mismatches" between managers are definition mismatches. One dictionary and one source of truth fix them.

Week 42 · 12–18 Oct 2026

Pre-publish checks

Funnel order holds	Requests ≥ assigned ≥ completed in all 96 city-weeks	Pass
Cancellations reconcile	Completed = assigned − customer − partner cancels, every row	Pass
No impossible counts	On time ≤ completed, perfect ≤ on time, stock-outs ≤ partners	Pass
Cities add up to the ops-app total	12 weeks, zero difference	Pass
Duplicate bookings removed	412 rescheduled bookings were logged twice. Counted once, by booking ID	Fixed
One fill-rate definition	City Ops sheet said 93.5%, MIS said 91.6%. See the box	Fixed
Same date cut-off everywhere	Service date, Monday to Sunday, IST	Pass
Small bases shown as counts	3 hubs had under 50 jobs. Their % swings are not trends	Note

Same metric, two numbers

City Ops reported fill rate at **93.5%**. The MIS showed **91.6%**. Both were right by their own rule: City Ops left out 1,620 requests that customers cancelled within 5 minutes.

Fix: one definition in the dictionary, signed off by all five managers (A-113). You get one number, with a one-line note on what changed.

The averaging trap

Averaging the 35 day-slot fill rates gives **91.9%**. Adding up the counts first gives **91.6%**. The shortcut reads 0.3 pts too high and hides 19% of this week's drop, because a quiet Monday slot counts as much as a packed Sunday evening.

Average of 35 slot rates	91.9%	Wrong
Total assigned ÷ total requests	91.6%	Right

Metric dictionary, v1

Perfect booking ★	Completed, started within 15 min of the slot, no complaint, no redo or refund, rated 4★+ or not rated. Rate = ÷ booking requests
Booking requests	Unique booking IDs with a service date in the week. A reschedule counts once
Fill rate	Requests assigned a partner ÷ booking requests
Jobs completed	Assigned − customer cancels − partner cancels
On-time arrival	Jobs started within 15 min of slot ÷ jobs completed (15 min to agree with you)
Cancellation rate	Cancelled after assignment ÷ assigned. Split customer side and partner side
Active partner	Did 1 or more jobs in the week
Jobs per partner per day	Jobs completed ÷ (active partners × 6 working days)
90-day retention	Partners from the cohort that joined 13 weeks ago, still active this week ÷ cohort size
Complaints per 1,000	Complaints ÷ jobs completed × 1,000
Redo / refund rate	Jobs redone or refunded ÷ jobs completed
Kit stock-out	Partners reporting 1 or more missing kit items ÷ active partners

Checks run on the ops app extract every Monday before 11:00 (mock). Dictionary v1, shared 18 Oct.

Every part of this pack maps to a line in the job description, and to work I have already done.

Built as a working demo of the Founder's Office – Operations role: MIS, reviews, follow-up and clean data.

Prepared by Chethan
For the interview on Mon 19 Oct

The JD asks for	Where it is in this pack	Where I've done it before
MIS reporting and dashboards	Slides 1–5, plus an Excel workbook where one data tab feeds every number	LVX: automated dashboards in Google Sheets and Power BI tracking ₹7 Cr+ of pipeline. Reporting accuracy up 30%
Turn data into insights	The leak split on slide 1, the ₹ impact tiles, and the kits → cancellations → fill rate link	LVX: funnel analysis across ₹3.5 Cr, ₹7 Cr and ₹9 Cr+ launches. Conversion up 20%
Weekly and monthly reports, review decks	Slide 1 is the review headline, slide 2 the one-page MIS. Monthly roll-up in the workbook	Techvaraha: weekly and monthly reviews across 4 departments. 15+ executive presentations
Spot discrepancies, gaps and bottlenecks	Appendix A: 8 pre-publish checks, and the 93.5% vs 91.6% fill-rate mismatch	LVX: reporting SOPs and data workflows. Manual errors down 35%
Track managers' priorities, deliverables and timelines	Slide 6: one tracker, one owner and one date per action, flagged automatically when late	Techvaraha: kept 15–20 people across our team and client CXOs moving together. Project delays down 25%
Follow up and close on time	Slide 6: review rhythm and a 4-step escalation ladder	Techvaraha: escalation turnaround down 40%. Zero missed deliverables for 3 quarters
Monitor metrics against targets	One targets table and one red-amber-green rule for all 14 KPIs	Techvaraha: 4 SOPs, QA workflows and KRAs. On-time delivery from 65% to 90%
Confidentiality and integrity	Mock data only. Formula cells locked, inputs marked, need-to-know sharing	LVX: owned investor consent and compliance workflows for the Dubai corridor
Strong Excel and Google Sheets	Week and city selectors recalculate the whole MIS: SUMIFS, INDEX-MATCH, named ranges, validation	Advanced Excel. Automated Google Sheets dashboards at LVX
Partner supply and ops	Slide 4: onboarding funnel, cohort retention, utilisation	Built a network of 1,400+ healthcare practitioners and 15+ hospital tie-ups. Ran sourcing, inventory and QC at Gomedha
A fast leadership office	Built over one weekend, from public information	Two Founder's Office roles. Best Execution Award 2025

My first 90 days

Days 1–30
Learn each manager's area. Audit today's MIS. Write the metric dictionary.

Days 31–60
Launch one weekly MIS and one action tracker. Run the weekly review.

Days 61–90
Automate the manual parts. Own one bottleneck fix end to end, picked with you.

Public facts this mock is scaled to

Bookings a month	**about 3.5 lakh**
Partners onboarded	**12,000+**
Active partners	**about 7,500**
Cities	**55–60**

From company statements and press (YourStory, Apr 2026). Everything else in this pack is mock.

What I'd confirm in week one

- Who the five managers are, and what each one owns.
- Where the MIS lives today, and what hurts most.
- Which number you trust least.
