1 · What customers say

# Three problems are 59% of complaints.

The 500 most recent App Store reviews, each tagged with the one reason that customer would contact support.

Yes Madam · App Store India
18 Jun – 21 Oct 2026

Complaints
**288**
of 500 reviews

Top 3 drivers
**59%**
of complaints: No-shows, Price & offers, Service quality

Already contacted support
**72**
71% of them about the top 3

Support didn't fix it
**88%**
63 of the 72 who contacted

## Complaints by driver

| Driver | Reviews | Share | Running | Contacted support |
|---|---|---|---|---|
| **1. No-shows & cancellations** | 59 | 20% | 20% | 26 |
| **2. Price & offer clarity** | 56 | 19% | 40% | 7 |
| **3. Service quality & conduct** | 55 | 19% | 59% | 18 |
| **4. Products used** | 30 | 10% | 69% | 5 |
| **5. App & booking bugs** | 29 | 10% | 80% | 5 |
| **6. Payments & refunds** | 12 | 4% | 84% | 6 |
| **7. Support itself** | 5 | 2% | 85% | 3 |
| **8. Late arrivals** | 4 | 1% | 87% | 2 |
| **9. Other or vague** | 38 | 13% | 100% | 0 |
| **All complaints** | **288** | **100%** | | **72** |

**Reviews skew negative.** 45% are 1★ against a 4.73★ store average, and they aren't tickets. Read this as the mix of problems, not the rate.

**51 of the 72** customers who already contacted support are about these three. No-shows alone: 26.

Source: Apple App Store (India), public customer-reviews feed. 500 most recent reviews, 18 Jun–21 Oct 2026. Tagged twice with one codebook; disagreements settled.

# No-shows & cancellations lead. 44% of those customers had already called support.

Real quotes. Names removed.

#1

## No-shows & cancellations

**20%** 59 complaints

44% called support | 2% high severity | 17% will leave

| | |
|---|---|
| Cancelled at the last minute | 25 |
| Didn't show up | 20 |
| Rescheduled again and again | 8 |

★★★★★ 2 Aug

“I booked a service for 4:30 PM today, and instead of informing me beforehand, they called me at exactly 4:30 PM to say that no professional was available”

★★★★★ 5 Sept

“professional refused to come and asked me to cancel and when I told her u cancel she kept calling me till I cancelled it.”

#2

## Price & offer clarity

**19%** 56 complaints

13% called support | 2% high severity | 13% will leave

| | |
|---|---|
| Offer or coupon not honoured | 34 |
| Extra charges at checkout | 15 |
| Membership or package confusion | 4 |

★★★★★ 9 Oct

“The first 2 days the slots were already over by 1:02 pm.”

★★★★★ 19 Oct

“If I’m booking a spa for 970 it sums up to 1399 by the end of the payment”

#3

## Service quality & conduct

**19%** 55 complaints

33% called support | 40% high severity | 20% will leave

| | |
|---|---|
| Poor skill | 20 |
| Burn, cut or rash | 17 |
| Rushed or incomplete | 9 |

★★★★★ 13 Oct

“I got burned on my hand after my waxing, and customer support said they'd give me a 400 free coupon. What do I do with my hand now?”

★★★★★ 22 Sept

“One knocked off a good part of my eyebrow I was hoping that’s a basic skill but guess not.”

Source: Apple App Store (India), public customer-reviews feed. 500 most recent reviews, 18 Jun–21 Oct 2026. Tagged twice with one codebook; disagreements settled.

3 · Root causes

# Each one traces back to something the operation controls.

Five whys per driver. In reviews customers say it. To verify my hypothesis, checked in week 1.

## No-shows & cancellations

**Why 1** The assigned professional declined, went on leave or fell ill, and no one else was sent (#62, #247, #250) In reviews

**Why 2** Nobody checks before the slot that she is coming. The customer finds out at the slot time, or only when she calls support (#15, #193, #338) In reviews

**Why 3** Accepting a job does not lock the professional in: some call and ask the customer to cancel instead (#127, #219, #362) In reviews

**Why 4** The app shows slots when no professional is free, and products run short too, so there is no one ready to send instead (#73, #284, #394) In reviews

**Why 5** Slots are sold off the calendar, not off confirmed professional capacity in that area and hour, and payment is taken before anyone confirms. To verify

**LIKELY ROOT CAUSE**

Slots are sold before a professional is confirmed, and nothing checks or backfills a dropped job before the slot time.

## Price & offer clarity

**Why 1** The offer they were sent could not be booked, or the final price was higher than the price shown (#10, #23) In reviews

**Why 2** The free pedicure opens at 1 pm for everyone. Slots are gone by 1:02, and the app crashes at checkout in the rush (#78, #121, #138) In reviews

**Why 3** It reads as a scam, not a sell-out: customers call it 'fake' and 'bluffing', and nothing tells them how few slots there were (#48, #77, #121) In reviews

**Why 4** Compulsory fees sit outside the listed price: a platform fee, a ₹99 kit charge, a ₹300 line labelled tax. They appear only at checkout (#55, #126, #190) In reviews

**Why 5** Offers and price pages are judged on installs and visits, not on how many offers are honoured or how many complaints they create. To verify

**LIKELY ROOT CAUSE**

Offers and prices are built to attract, not to be honoured: a flash offer that sells out in minutes is pushed to everyone, and compulsory fees show up only at checkout.

## Service quality & conduct

**Why 1** The professional lacked the skill for that service: burnt skin after waxing, ruined brows (#41, #152, #191) In reviews

**Why 2** Professionals reach customers before their skill on each service is proven. Quality is checked by ratings after the job, not before it. To verify

**Why 3** Professionals rush the job: 'in too much hurry', a facial done in 30 minutes (#50, #264, #351) In reviews

**Why 4** When something goes wrong, there is no real follow-up: a ₹400 coupon for a burnt hand, no reply to photos of a burn, a promised refund that never came (#41, #217, #104) In reviews

**Why 5** Complaints are closed case by case in support and don't flow back to the professional's record, training or assignment. To verify

**LIKELY ROOT CAUSE**

No closed loop from complaint to professional: skill isn't certified per service before risky jobs like waxing, and complaints end in coupons instead of retraining.

4 · Impact

# What the top three cost, and what fixing them is worth.

Move any input. Only the 59% comes from the reviews; bookings are a public figure; the rest are my assumptions.

**Assumptions**

Bookings a month **3,50,000**

Public figure: about 3 to 3.5 lakh

Contacts per 100 bookings **12**

Assumption: replace with the real rate

Cost per contact (₹) **₹45**

Assumption: blended chat and call

Cut from the fixes **30%**

Target, not a result

Customers lost per bad experience **10%**

Reviews say 16%; real rate is lower

Yearly value of a customer (₹) **₹5,400**

Assumption: ₹1,350 a visit, 4 visits a year

Contacts a month
**42,000**
₹18.9 L a month in support cost

From the top 3
**24,792**
59% of contacts, if tickets mirror reviews

Removed by the fixes
**7,438**
a month · ₹40.2 L a year saved

| Driver | Share | Contacts / month | Cost / month | After fixes |
|---|---|---|---|---|
| No-shows & cancellations | 20% | 8,604 | ₹3.9 L | 6,023 |
| Price & offer clarity | 19% | 8,167 | ₹3.7 L | 5,717 |
| Service quality & conduct | 19% | 8,021 | ₹3.6 L | 5,615 |
| All other drivers | 41% | 17,208 | ₹7.7 L | 17,208 |
| **Total** | **100%** | **42,000** | **₹18.9 L** | **34,563** |

**The bigger prize is retention.** If 10% of the customers behind 7,438 fixed experiences a month would otherwise leave, keeping them is worth up to **₹4.82 Cr** a year.

Source: Apple App Store (India), public customer-reviews feed. 500 most recent reviews, 18 Jun–21 Oct 2026. Tagged twice with one codebook; disagreements settled.

5 · First three fixes

# Three fixes, three owners, one number to track.

Fix 1 · No-shows & cancellations

## Confirm or reassign 2 hours before

Professional confirms 2 hours before the slot. No confirmation means auto-reassign, and the customer hears before the slot, not at it.

| | |
|---|---|
| OWNER | City Ops, Supply and Product |
| METRIC | Failed bookings per 100, partner side |
| TARGET | Down 40% in 8 weeks; 90% of failures with 2+ hours' notice |
| TEST | 2 pilot cities vs 2 control cities, 4 weeks |

Fix 2 · Price & offer clarity

## Price shown is price paid; honest offers

Compulsory fees inside the listed price. Flash offers show how many slots exist and stop being pushed once sold out.

| | |
|---|---|
| OWNER | Growth, Product and Finance |
| METRIC | Offer and price complaints per 1,000 bookings |
| TARGET | Down 50%, with checkout conversion flat or better |
| TEST | All-in prices for 10% of users, 2 weeks |

Fix 3 · Service quality & conduct

## Certify risky services; close the loop on complaints

Certify professionals per service, waxing first. Every injury gets a call within 24 hours, and the professional is paused for review.

| | |
|---|---|
| OWNER | Training & QA and CX |
| METRIC | Injury and quality complaints per 1,000 jobs |
| TARGET | Down 30% in 12 weeks; no repeat complaint within 30 days of retraining |
| TEST | Before vs after by hub, 12 weeks |

**One number for the programme: contacts per 100 bookings**, by driver, every week. Watch first-contact resolution next to it, so contacts aren't cut by making support harder to reach.

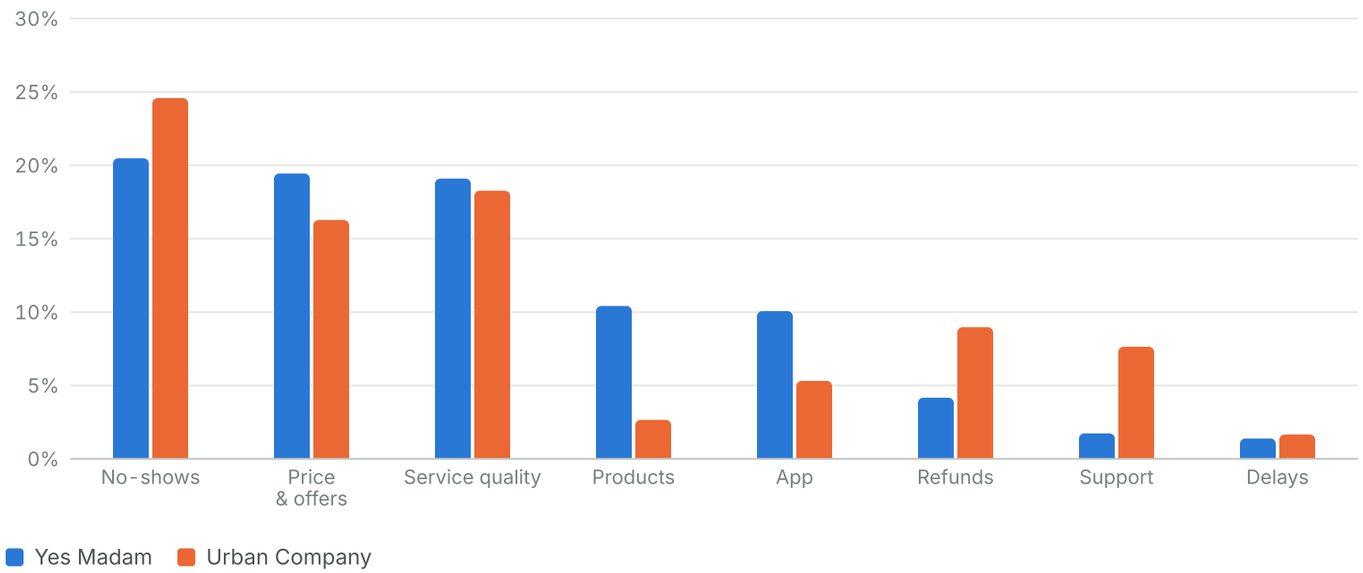

Source: Apple App Store (India), public customer-reviews feed. 500 most recent reviews, 18 Jun–21 Oct 2026. Tagged twice with one codebook; disagreements settled.

A · Benchmark: Urban Company

# Same top drivers as Urban Company, but Yes Madam over-indexes on products.

Same method, 500 most recent Urban Company App Store reviews (10 Sept – 21 Oct). Urban Company covers all home services, so salon issues are only part of its mix.

### Share of complaints by driver

| Driver | Yes Madam | Urban Co. | Gap |
|---|---|---|---|
| **No-shows & cancellations** | 20.5% | 24.6% | −4.1 pts |
| **Price & offer clarity** | 19.4% | 16.3% | +3.2 pts |
| **Service quality & conduct** | 19.1% | 18.3% | +0.8 pts |
| **Products used** | 10.4% | 2.7% | +7.8 pts |
| **App & booking bugs** | 10.1% | 5.3% | +4.8 pts |
| **Payments & refunds** | 4.2% | 9.0% | −4.8 pts |
| **Support itself** | 1.7% | 7.6% | −5.9 pts |
| **Late arrivals** | 1.4% | 1.7% | −0.3 pts |

**Same pain, different weights.** Urban Company's top three are no-shows and cancellations, service quality, price and offer clarity. Overlap with Yes Madam's top three: 3 of 3.

**Yes Madam over-indexes on products**: 10% of complaints vs 3% at Urban Company (+8 pts).

**Yes Madam under-indexes on support**: 2% vs 8% (-6 pts).

Both apps: over 4 in 10 written reviews are 1★ (45% Yes Madam, 42% Urban Company), against store averages of 4.73★ and 4.77★. Reviews skew negative everywhere.

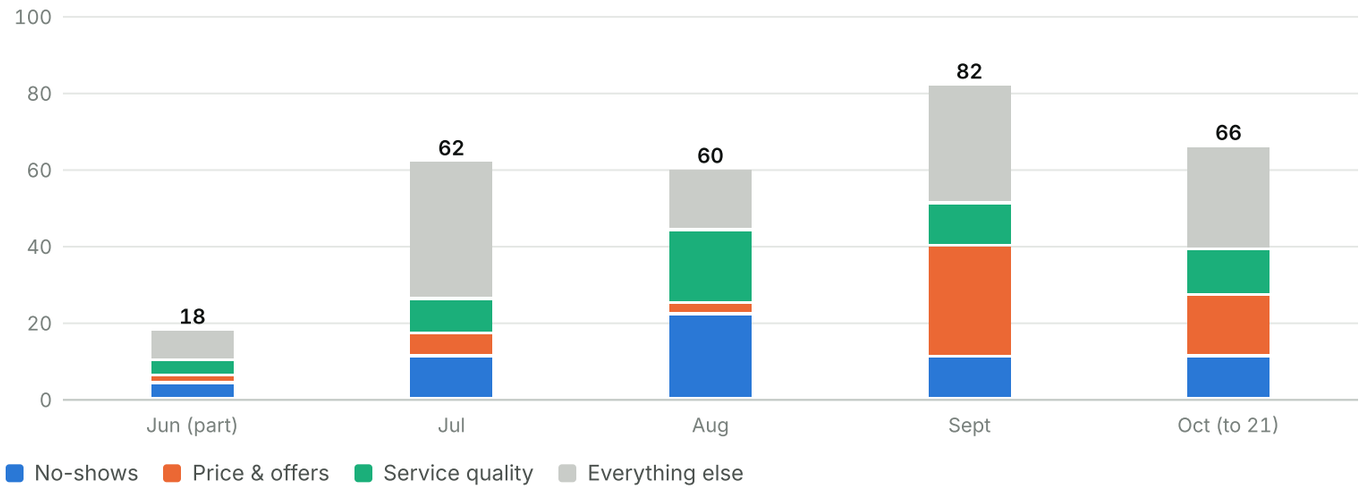

Source: Apple App Store (India), public customer-reviews feed. 500 most recent reviews, 18 Jun–21 Oct 2026. Tagged twice with one codebook; disagreements settled.

# Complaints by month and by app version.

Complaint reviews by month and driver, and app complaints by app version.

### Complaints by month

Top 3 drivers in colour, the rest in gray. Offer complaints ('offer or coupon not honoured') peak in Sep (19 reviews). The free-pedicure campaign alone is 17 of the 56 price and offer complaints (13 Sep to 17 Oct). Take it out and price and offers still rank #3.

### App complaints by version

Reviews tagged "App", by the version the reviewer was on.

| Version | Reviews | App complaints | Share |
|---|---|---|---|
| **18.9.0** | 87 | 10 | 11% |
| **18.8.0** | 100 | 9 | 9% |
| **18.7.0** | 70 | 3 | 4% |
| **18.6.0** | 17 | 0 | 0% |
| **18.5.0** | 133 | 5 | 4% |
| **18.2.0** | 93 | 2 | 2% |

**Version 18.9.0** has the most app complaints (10 of 87 reviews on it). 29 reviews in all are about the app itself: a release-quality question for tech, not an ops one.

Source: Apple App Store (India), public customer-reviews feed. 500 most recent reviews, 18 Jun–21 Oct 2026. Tagged twice with one codebook; disagreements settled.
