Chethan N: ownership, KPIs and measurable outcomes

Your own story for the YourDOST interview: what you owned, the KPIs, how you executed, what you delivered, how you stay disciplined and focused, and the four big HR answers rewritten around your real background. Every number comes from your profile ("Founder's Office Executioner").

1. "Tell me about yourself" (45 seconds)

"I'm Chethan. I started in healthcare. I'm a physiotherapist: I handled 150+ inpatient and outpatient cases across cardiology, neuro, ortho, surgery and OBG at ESIC and Brains, and I designed 20+ community rehab interventions at a BBMP PHC. That taught me that systems either save people or fail them.

I built MBS Physiotherapy into a network of 1,400+ physiotherapists and surgeons, with 15+ hospital tie-ups. Then I moved into the founder's office. At **Techvaraha** I ran 4 strategic projects across 3 verticals worth ₹40L in revenue outcomes, lifted on-time delivery from **65% to 90%**, and supported a ₹40L fundraise. Now at **LetsVenture (LVX)** I run operations for AIF scheme launches (₹3.5Cr, ₹7Cr and ₹9Cr+ deals), including investor workflows for the Dubai corridor.

I'm doing the Master Camp at Masters' Union, where my team ranked 1st of 350+ in a GTM challenge, and I received a Best Execution Award in 2025. YourDOST sits where my two worlds meet: healthcare, and building and scaling."

2. Ownership stories (STAR: situation, task and ownership, KPIs, how I executed, result)

A. LetsVenture (LVX): AIF Operations, Founder's Office (Feb 2026 – present)

Situation: LVX was launching new AIF schemes at deal sizes of ₹3.5Cr, ₹7Cr and ₹9Cr+. Each launch had many moving parts: investors, sales, legal and PMS, plus a Dubai corridor with its own compliance needs.

What I owned: operational tracking of each scheme from investor onboarding to closure; investor consent workflows for Dubai; pipeline dashboards; and SOPs for high-value schemes.

KPI I was measured on	How I executed	Outcome
On-time scheme closure (onboarding → closure)	A single tracker per scheme with stage owners and dates; daily follow-ups on blockers	Seamless onboarding-to-closure across ₹3.5Cr, ₹7Cr and ₹9Cr+ schemes
Compliant cross-border execution	Aligned sales, legal and PMS on one consent workflow for the Dubai corridor; async hand-offs across Bangalore, Gurugram and Dubai	Compliant deal execution; **40% faster escalation cycle**

Reporting accuracy and transparency	Built performance dashboards for the deal pipeline	Tracks **₹7Cr+** cumulative pipeline (₹100Cr+ deal flow tracked overall); better accuracy and visibility for leadership
Error rate on high-value schemes	Wrote standard SOPs and checklists	Fewer manual errors; higher process efficiency

> **One-liner:** "At LVX I own the rails a scheme runs on: the tracker, the consent workflow, the dashboard and the SOP, so a ₹9 crore deal closes on time and compliantly across three cities."

B. Techvaraha Solutions: Founder's Office, Strategy and Operations (Jan 2024 – Oct 2025)

Situation: the founder had several strategic projects across 3 verticals, slipping delivery, and a fundraise to support.

What I owned: 4 end-to-end strategic projects; coordinating 15–20 people across functions; executive and investor decks; fundraise support; delivery SOPs and KRAs.

KPI	How I executed	Outcome
Revenue from strategic projects	Scoped 4 projects across 3 verticals, set milestones and owners, and ran them end to end	**₹40L** in revenue outcomes
Project delays	Orchestrated cross-functional teams of 15–20 with clear owners and a weekly review cadence	Delays down **25%**
On-time delivery	Designed 5+ SOPs, QA workflows and KRAs so everyone knew what "done" meant	On-time delivery **65%** → **90%**
Client acquisition	Produced 25+ executive decks and investor reports	Contributed to **₹20L** in client acquisition
Fundraise	Supported a ₹40L raise: investor materials, follow-ups, data room	Investor engagement up **35%**; closure **20% faster**

> **One-liner:** "At Techvaraha I was the founder's execution arm. I took delivery from 65% to 90% on time, cut delays 25%, and helped close a ₹40L raise 20% faster."

C. MBS Physiotherapy: Founder (Feb 2021 – Apr 2025)

Owned: everything, from zero. **KPIs:** network size, partnerships, engagement. **Executed:** built a professional network, negotiated hospital collaborations, ran tele-platform operations for remote patients and professionals. **Outcome: 1,400+** physiotherapists and surgeons in the network, **15+** hospital collaborations, new revenue channels.

> **Why it matters for YourDOST:** "I've built a supply network of health professionals before (1,400+), and I've run tele-health operations. YourDOST's core is also a network of 1,000+ experts delivering care remotely."

D. Healthcare Systems Intern: ESIC, Brains, BBMP PHC (Jul – Dec 2023)

Assessed **150+** cases across 5 specialities; designed **20+** community rehab interventions; coordinated with **25+** stakeholders to smooth acute-to-community transitions. It taught me execution under pressure, and that care fails at the hand-offs.

3. Your KPIs and outcomes at a glance

Area	KPI	Measurable outcome
Delivery	On-time delivery rate	65% → **90%** (Techvaraha)
Speed	Project delays; escalation cycle time	Delays **−25%**; escalations **40% faster**
Revenue	Revenue from projects; client acquisition	**₹40L** project revenue; **₹20L** client acquisition
Fundraise	Investor engagement; time to close	Engagement **+35%**; closure **20% faster**; ₹40L raise
Deal operations	Schemes executed; pipeline tracked	₹3.5Cr / ₹7Cr / ₹9Cr+ schemes; ₹7Cr+ dashboard pipeline; **₹100Cr+** deal flow tracked
Process quality	Errors; SOP coverage	5+ SOPs at Techvaraha; SOPs for high-value schemes at LVX; fewer manual errors
Communication	Decks shipped	**25+** executive and investor decks
Network	Partners and professionals	**1,400+** network; **15+** hospital collaborations; 25+ stakeholder networks
Recognition	—	Best Execution Award 2025; Rank 1 of 350+ (Masters' Union × MNNIT GTM; Blue Tokai GTM)

4. How I take ownership, stay disciplined, and keep focus

Ownership: say it like this

> "For me, ownership means I treat the outcome as mine even when the team isn't. I write down what 'done' means and the KPI, I name an owner for every step, and I track it daily until it closes. If something slips, I escalate early with a fix, not just a problem. At Techvaraha that's how on-time delivery went from 65% to 90%."

Discipline: my system

- **Write it down first:** SOPs, KRAs and checklists before scaling (5+ at Techvaraha, high-value scheme SOPs at LVX).
- **One source of truth:** a dashboard or tracker for every pipeline, so nobody relies on memory.
- **Fixed rhythm:** daily blocker check, weekly review with owners, and a monthly look-back on KPIs.
- **Speed with a deadline:** 0 → 1 blueprints in under 72 hours, then iterate. I don't wait for perfect.
- **Async by design:** clear hand-offs across Bangalore, Gurugram and Dubai cut escalation time 40%.

Focus: say it like this

> "I keep focus by choosing the one number that matters for the quarter, like on-time delivery or deals closed, and saying no to work that doesn't move it. I protect the founder's bandwidth by taking the operational load off their plate in week one. And outside work, long rides and runs (I ran the 10K Founder Run) keep my head clear."

A time things went wrong (have this ready)

Use the Techvaraha delivery problem: *"Delivery was 65% on time. Instead of blaming teams, I found the root cause: no shared definition of 'done' and no owners. I built SOPs, QA workflows and KRAs, and within the period on-time delivery reached 90%."*

5. The four big questions, using your real background

Why are you the right fit?

"Three reasons. **One, I understand care from the inside.** I'm a physiotherapist who handled 150+ clinical cases and built a 1,400+ professional network with tele-platform operations, which is exactly YourDOST's model of experts delivering care remotely. **Two, I'm a founder's-office operator with numbers to show:** on-time delivery 65% → 90%, delays down 25%, a ₹40L fundraise closed 20% faster, and AIF schemes up to ₹9Cr run end to end at LVX. **Three, I've already done the job in this assignment:** I found a non-obvious insight in the parent survey, made 10 posts for the B2B utilisation problem, and built the Founders Program P&L to profit in Year 3."

Why YourDOST?

"I started my career in hospitals and saw that physical recovery often stalls because of the mental side, and that people rarely ask for help. YourDOST was built on exactly that gap. It's also a rare company: profitable, debt-free, 30 lakh sessions and 500+ institutions on under $2M raised. Revenue has been around ₹20 crore for three years, so the next chapter is new growth engines: founders, parents, deeper B2B utilisation. That's where a founder's-office person who has done healthcare, investor work and GTM can add the most."

Where do you see yourself in 3 and 5 years?

"**Year 1:** own an outcome end to end, for example the Founders Program pilot with 3 partners, turned into a working P&L. **Year 3:** lead a business line here, such as startups and founders or a new segment, with its own revenue target and team, helping YourDOST grow past ₹20 crore. **Year 5:** a business leader running a vertical or a new market, inside or alongside YourDOST. I want to grow by owning bigger problems, and I'm investing in that now through Masters' Union."

What drives you?

"Turning chaos into a shipped, measurable outcome, and seeing it help a real person. In the ICU and at the PHC I saw that good systems change outcomes for people. In the founder's office I saw the same with SOPs and dashboards. Mental health is where the gap between help existing and people reaching it is the biggest, and closing that gap is what I want to work on."

Keep your numbers consistent: your profile shows LVX impact as "₹40Cr–₹100Cr", a ₹7Cr+ dashboard pipeline, and ₹100Cr+ deal flow tracked. If asked, explain it clearly: "I track ₹100Cr+ of deal flow; my dashboard covers a ₹7Cr+ live pipeline; schemes I ran were ₹3.5–9Cr+." The "how I executed" steps are written from your profile's outcomes. Change any step that isn't exactly how you did it, so every story is 100% yours.
